WORK EXPERIENCE

Senior Software Engineer

GEP Worldwide

09/2024 – present | Hyderabad, India

- Built an Excel-to-document migration utility (~400K documents) using **Camunda**, a **.NET API** validation layer, and a staging pipeline.
- Built a monitoring tool using Claude code for failed Camunda instances with one-click reprocessing, cutting escalations and reducing reprocessing times.
- Led a Neo4j-to-MongoDB migration (15 domains, ~6M docs in one domain) utilizing **Coding agents**, eliminating dual database licensing costs.
- **Led the India team**, facilitating daily stand-up meetings to assess progress and resolve blockers, ensuring smooth project execution.
- **Conceptualized and implemented** a new Legal Entities framework tailored for a major client.

Software Engineer

GEP Worldwide

06/2022 – 09/2024 | Hyderabad, India

- **Actively owned and built** production ready microservices and Camunda BPMN processes for Third Party Risk Assessment (TPRM) Team. Helped stabilize triggering which is highly mission critical.
- Led successful V1 to V2 migration of **Forms** which one of the biggest TPRM modules with over 90K documents significantly reducing failure rates and state machine issues.
- Improved **CSAT** through proactive New Relic monitoring and faster issue resolution.

Technology Intern

GEP Worldwide

04/2021 – 06/2021 | Remote

- Developed a Proof of concept for a new Global Login feature in the Architecture team.
- Researched and Integrated Caching technologies such as Hazelcast and Redis Cache into the POC Asp.Net MVC application.
- Won an internal hackathon by building a notification feature. Designed and build the backend using Pusher and MongoDB and .net core API.

PROJECTS

Ole

A Free, Offline API testing tool

- Solo-built a cross-platform (Windows/macOS/Linux) offline API testing tool (Postman alternative) entirely with Claude Code and GitHub Copilot in a few days.
- Implemented a Collection Runner, `pm.test` / `pm.expect` scripting engine, and Postman-collection import.

MALJPEG - A machine learning solution for the detection of malicious images

- Created a database of malicious images and benign images using Virusshare and other sources.
- Trained various machine learning models for the prediction task.
- Designed a frontend where users can upload photos and check for malware.

EDUCATION

Pre University Education

Narayana Pre University College

06/2016 – 03/2018 | Bengaluru, India

- Graduated with percentage of **96.83**

High School

Jnana Ganga Central School

06/2013 – 03/2016 | Bellare, Dakshina Kannada, India

- Graduated with **10** CGPA

Btech in Information Technology

National Institute of Technology Karnataka

07/2018 – 05/2022 | Surathkal, Mangaluru, India

- Overall GPA of **7.63**

ORGANIZATIONS

Incident NITK 2022
